12 DIY Electrical Work: Are Aussies Dumber Than Kiwis?

Kiwis are legally entitled to do all sorts of electrical work in their own homes but are Aussies too dumb? Yes, say our state governments – by Ross Tester

24 A Look At Crash Test Dummies

They're really not dumb but instead carry lots of smart electronics to record their "pain" – by Peter Holtham

73 Review: Altitude 3500-SS Stereo Valve Amplifier

How good are modern valve stereo amplifiers? We check out the impressive Altitude 3500-SS – by Leo Simpson

Projects To Build

30 DSP Musicolour Light Show

It drives coloured lights to the beat of the music and has a dot matrix display menu that doubles as a spectrum analyser or VU meter – by Mauro Grassi

40 PIC-Based Flexitimer Mk.4

It's easily programmed, offers time periods ranging from 1s to 90 hours and can be set for one-shot timing or continuous on/off cycling – by Jim Rowe

58 USB Power Injector For External Hard Drives

USB hard drives are usually powered direct from your PC's USB ports but what if they're not up to it? This project is the answer – by Greg Swain

68 Balanced/Unbalanced Converter For Audio Signals

Easy-to-build unit can convert an unbalanced audio signal input to balanced outputs and vice versa. It's just the shot for long cable runs – by John Clarke

84 A Quick'n'Easy Digital Slide Scanner

Want to copy your slide collection to your PC before it's too late? This method is quick, simple and doesn't require any electronics – by Brian Coulson

Special Columns

44 Serviceman's Log

Honey, I wrecked the iMac! – by the TV Serviceman

63 Circuit Notebook

(1) Synchronous AM Detector For Improved Shortwave Reception; (2) Photo-Interrupter Bias Circuit For Electronic Ignition Systems; (3) Infrared Close Object Detector; (4) Meteoric LED Display; (5) 6-Digit Demonstration Counter; (6) Simplified Headphone Adaptor

86 Vintage Radio

The Pye TRP-1 portable HF transceiver – by Rodney Champness
