

IT'S ALL (N THIS ISSUE

REVIEW: ICOM IC-756

Boy, have we been keen to see this impressive newcomer! Lucky Neil, VK3ND, drew the long straw. So does he like its HF, DSP, 6M? And what about *that* screen? Oh, wow...

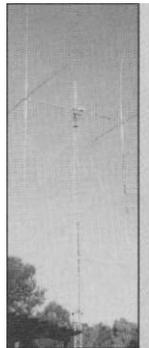

MAXIMISE YOUR CB!

So you have a CB parked in the corner gathering a bit of dust, eh? Here's a few clues about how to get some *real* value from it. A Jason Reilly report...

BUILD YOUR OWN QUAD BEAM!

Welcome back Steve, VK6VZ! One of the most famous HF antennas is the Quad beam — and now you can *build* one yourself with Steve's clear step-by-step instructions!

KENWOOD TS-570S

A very brief peek at Kenwood's latest HF+6M DSP box. Not bad...

BUILD A 40/80M LISTENING ANTENNA

This isn't exactly your average DX beam — it's a *ferrite rod* antenna for 40 and 80. And get this — it actually seems to work, quite well!

BAUDWALK SUMMARY

Here's another index of Internet web addresses. These sites were reviewed during the past six months by Tom Sundstrom.
